

BOARD FOR THE FINAL EXAMINATION OF
STUDENTS IN YORKSHIRE TRAINING COLLEGES

FINAL EXAMINATION, 1937.

ANATOMY.

FRIDAY, *June 25th.* 9.30—12.30.

Carnegie Physical Training College.

[*Answer all questions.*]

1. Describe the arches of the foot. Of what use are they and how are they maintained?

2. Write a short account of the anatomy of the alimentary canal.

3. Write a brief account of the muscles used in respiration and state what part each plays.

4. Compare and contrast the movements of inversion and eversion of the foot with the movements of pronation and supination as seen in the upper limb.

What joints and muscles are involved in each case?
